

NSS Activity in the AY-17/18

As a part of social activities under the NSS program, Dr. B.C. Roy College of Pharmacy and AHS organized an event with the differently abled children of HOPE School, Durgapur on September, 2017 also to mark the celebration of National NSS Day and World Pharmacist Day. It was an effort of the institute to contribute to the lives of the children through involvement through organizations catering for the same. The differently abled children performed various cultural activities with grace and confidence. In the end, their performances were appreciated in the form of gifts and goodies from our institute. The accolades and acceptance that the differently abled children gathered also instilled a sense of positivity in our students and inspired them immensely.
