### HANDS ON LEARNING

As teachers we must focus on the learner's outcome. Hands-on learning allows students to incorporate what is being taught into real world situations, thus allowing the student to retain more information. The students gain knowledge in laboratories located within the Institute. All the faculty members have designed various outcome based experiments as per the syllabus assigned by MAKAUT. The students gain practical knowledge including instrumentation, operation, and calibration of all apparatus or instruments used in laboratories. It helps cement the concepts of the learning into their long-term memory. If the hands-on activity is positive they will use it as training tool themselves.
