Institution frequently updates its IT facilities including Wi-Fi

Describe IT facilities including Wi-Fi with date and nature of updating within a maximum of 500 words

- The college is committed to provide competitive IT facilities, ensure network security, with sufficient access to internet contents, monitor and manage software and hardware assets, manage risk and take care of overall maintenance by engaging technicians for annual maintenance contract and as and when the need arises.
- The college is committed to maintaining the security, confidentiality, integrity and availability of information stored in the computer networks and data communications infrastructure is a responsibility shared by all users of those systems. We provide proper login system to our users. Beside this we use dedicated antivirus system for computers. All users of BCRCP systems are responsible for protecting those resources and the information processed, stored or transmitted thereby as set forth in this policy.
- We are committed to provide network security by regulating and moderating the content access in internet and as well as other national laws regarding use and security of BCRCP network systems. We use windows fire wall, login system and valid IP configuration to protect our network. Any violations of such activities are monitored continually by the System Administrator and his team.
- The objective of our college is to manage risks by managing network security to minimize the exposure of itself and its network users to untoward event, or set of occurrences able to cause adverse effects, while concurrently maximizing the efficiency and effectiveness of its operations in accordance with best practices recommended.
- We use maximum number of legal applications and system soft-wares to comply the requirements. To manage its software assets to derive maximum benefit to the BCRCP and its computing users and to ensure that all members of the computing users use, reproduce, distribute, transmit and use computer software in compliance with the national laws.
- College encourages our users to use open source products, either Operating systems or specific applications and foster a climate for creating / adapting open source solutions and to keep IT related expenditure at a minimum.
- College is committed to upkeep the environment by using efficient power consumption, IT upkeep practices and to dispose all IT wastes in environmentally sustainable manner by maintaining the IT waste management laws.
- Hardware, Software, Network and Internet requirements are upgraded and updated in a regular course to fulfill the growing demands of the users.
