Cordially invite you to join a

Webinar
On

Applications of Protein Nanocages Post Covid-19

On 6th July 2020

Time: 5:00 P.M IST

Speaker
Sie In Lim
Associate Professor
Nanyang Technological University
Singapore

Chairman
Prof. (Dr.) Subrata Chakraborty

Convener
Prof. (Dr.) Subhabrata Ray

Coordinator
Dr. Santanu Chakraborty
Mr. Sagar Sengupta

Register on or before 5th July 2020

[Click Here for Registration Link](#)

e-Certificates will be awarded to all participants

About us
Dr. B. C. Roy College of Pharmacy and AHS, Durgapur is a primary provider of qualified, trained industry ready Pharmaceutical Technologists. Imparting application based pharmaceutical knowledge, BCRCP offers an open and friendly atmosphere where students learn, share and shine with expertise in pharmaceuticals to ensure a healthier tomorrow.

Courses Offered

D.Pharm

***B.Pharm (NBA Accredited)**

M.Pharm (Pharmaceutics) & M.Pharm (Pharmacology)

Section 2 of 3

Feedback Section

Give your feedback in the following scale of 5:
5 - Outstanding, 4 - Excellent, 3 - Good, 2 - Fair, 1 - Poor

1. Relevance to various Pharmacy academic curriculum? *

Poor 1 2 3 4 5 Outstanding

2. Was the webinar relevant to current social scenario? *

Poor 1 2 3 4 5 Outstanding

3. Was the webinar interactive to the participant? *

Poor 1 2 3 4 5 Outstanding

4. Impact on environment and sustainability *

	1	2	3	4	5	
Poor	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	Outstanding

5. Applicability to enhance ethical principles in professional and social context *

	1	2	3	4	5	
Poor	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	Outstanding

After section 2 Continue to next section

Section 3 of 3

Assessment Section

Based on your understanding of today's episode, kindly answer the following

Which of the following is a natural protein nanocage? *

- Viruses
- Ferritin
- E2 protein
- All of these

The cage structure of the protein nanocages are formed by *

- genetic engineering
- chemical engineering
- self-assembly
- All of these

Ray

Principal
Dr. B. C. Roy College of Pharmacy & A.H.S.
Bidhannagar, Durgapur-713206, Burdwan

The cage structure of the protein nanocages are formed by *

- genetic engineering
- chemical engineering
- self-assembly
- All of these

The target surface of the protein nanocages for chemical/ genetic engineering may be *

- exterior surface
- interior surface
- intersubunit
- all of these

Protein nanocages have potential application in *

- immunity bolstering
- acute therapeutics
- diagnostics
- all of these

Nature-derived nanocarriers are potential alternatives to synthetic ones because of *

- better biocompatibility
- lesser cellular uptake resulting minimal toxicity
- better active targeting
- both lesser cellular uptake resulting minimal toxicity and better active targeting

Protein cages: applications and opportunities post COVID-19

Sierin Lim

School of Chemical and Biomedical Engineering

Webinar by Dr. B.C. Roy College of Pharmacy & Allied Health Sciences, Durgapur, India

6 July 2020

External Modifications: Display

Precise spatial control for multiple ligand display

Targeting

- Antibody
- Antibody fragment
- Peptides

• SPACE: Skin Penetrating and Cell Entering
 • α -MSH: melanocyte stimulating hormone

Immunomodulation

- Epitopes: malaria
- Peptides: CpG (in), gp100 (out)

REPORT

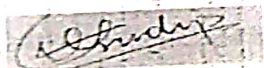

1. Dr. Sierin Lim, Associate Professor, Nanyang Technological University, Singapore, discussed about Protein Cages: Opportunities and Applications post Covid 19. She shared her expertise in the field and provided insights about the future of Protein cages.
2. All faculty members of the Institute, students from Dr. B. C. Roy College of Pharmacy & AHS and students along with faculty members from other colleges also participated in the seminar. A total of 1243 participants joined the session and felt satisfied with the webinar.
