•	Nature and Extent of involvement of Faculty and students in academic affairs/improvements			
	<p>An online feedback system has been prepared to document the feelings of the Students about the College and more specifically about the Academic and Extracurricular activities. These online feedbacks are taken usually at the end of each semester. The reports of the analysis of the feedback are sent to the concerned committee for screening and finding the conclusions. The concerned in consultation with the Director/Principal then take appropriate measures to address the weaknesses. Besides this, the suggestion box for the students has been fixed at ground floor of UG building. The college makes periodic review of the suggestions/complaints so received.</p>

	Teaching Learning Process	
	• Curricula and syllabus for each of the programmes as approved by the University	Curricula and syllabi as per MAKAUT, WB (available at http://www.wbut.ac.in/page.php?id=195) ❖ The Institution takes note of the dynamic teaching learning landscape and adapts its content delivery by teachers to meet the changing needs of the students. ❖ Now-a-days, teaching is no longer a one way delivery of facts to the students, rather a multi-way exchange of ideas. Keeping in view this motto, the teachers implement several novel strategies to make the classes lively and encourage students to actively participate in the teaching-learning process. ❖ Students are often divided into small groups of

maximum 10 students and the process of PEER TEACHING is followed. These SMALL GROUP DISCUSSIONS help in inculcating the habit of collaborative learning, bringing out the leadership as well as team manship among the students. This improves understanding and encourages self-learning. It is our team's observation that the self-esteem of the poor students gets improved through this exercise.

- ❖ Students are also given ASSIGNMENTS in each subject. Student groups are given different assignments to assess their team spirit, writing skill and to broaden their scientific and technical knowledge. This is a credit based evaluation, which is cumulatively added to their final credit.
- ❖ The list of experiments are prepared and displayed in the notice board by the concerned teacher as per the University curriculum in line with the topics covered in the corresponding theory subjects. Experiments are allotted to groups of 3/ 4 students well in advance so that they can prepare themselves before coming to the laboratory. A credit based daily evaluation system is followed to encourage the students' overall involvement, understanding and improve technical skills on the topics covered. A representative evaluation sheet is reproduced below:

Internal Continuous Evaluation System in place:				
	<ol style="list-style-type: none">1. Instruction Delivery & Instructional Methods: During each running semester certain study materials in the form of notes prepared by the individual subject teachers collected from different sources (including text books/Journals/Internet) are provided to the students for easy & thorough understanding on the overall subjects, when and where necessary.2. Small group discussion: Students of a specific class are divided into several small groups and allowed to prepare on specific topic(s) in order to facilitate their understanding on that specific topic through interaction among them.3. Peer teaching: Each student in the class is assigned a particular topic to prepare and subsequently deliver in the class (beyond the syllabus) so that he /she can gain a complete knowledge on that subject.4. Assignments: Assignments are given to the students for in depth work and understanding of a particular issue in a given subject. It also helps them to acquire knowledge on the issue beyond the syllabus.5. Project presentations: Projects (either theoretical or practical) help pupils to apply their knowledge for designing, formulation, construction, validation or evaluation of technological systems in realistic background. It equips students to carry out research in relevant fields or to handle trouble shooting problems arising specially in laboratory practice in pharmaceutical technology.6. Sessional and Improvement examinations: Sessional and improvement examinations are conducted in each class at regular intervals so that assessment of students' understanding towards the relevant subject is achieved. It also enables students to compensate their deficiencies & help them for better conception on the subjects. The institution thus follows the above processes for enabling the students so that they can contribute/apply their acquired knowledge to the health care system in the society as a whole.
